Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest the following limitations of independent claims 42 and 93, **"wherein the device comprises at least one attaching element comprising suckers, or a self-adhesive or rubbery surface, disposed on the power transfer surface which temporarily releasably attaches the device to the primary unit in any said position along said line such that the device is held on or in proximity to the power transfer surface, said attaching element(s) providing a non-gravitational force, acting to resist movement of the device away from the power transfer surface in a direction substantially orthogonal to that surface, when the device is attached to the primary unit in any said position along said line"** in combination with the remaining limitations of each claim. Claims 43-44 and 94- 95 depend from claims 42 and 43 respectively, and are therefore allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
